

# Road Conditions

## December 2012 & January 2013

### N1

National Route	N1
Section	Old Oak Interchange to Rawsonville
Distance	64 km
Description	Two-lane dual carriageway with paved shoulders.
Condition of Road	Fair to Good.
Comments	Routine road maintenance teams may be encountered.
Duration of Work	Ongoing
Contact for Routine Maintenance	Heuppschenne Lekay 082 782 9155

National Route	N1
Section	Rawsonville to Worcester
Distance	18.4km
Description	Two-lane single carriageway with passing lanes and paved shoulders.
Condition of Road	Fair to Good.
Comments	Construction work between Rawsonville and Worcester recommenced in August 2012. Motorists may expect up to two stop/go closures during the day time with traffic signal units at night. Waiting periods approximately 15 minutes at each closure. Loose stones may be encountered inside closures, where the speed restriction is 60km/h. Routine road maintenance teams may be encountered.
Duration of Work	Feb 2012 until Dec 2012
Contact for Routine Maintenance	Heuppschenne Lekay 082 782 9155

National Route	N1
Section	Worcester to Laingsburg
Distance	156 km
Description	Single carriageway with paved shoulders. The road through Hex River Pass is a four-lane dual carriageway (four km) with an arrestor bed in the south-bound direction before the hairpin curve known as "Spookdraai". Stopping places are provided at regular intervals.
Condition of Road	Good.
Comments	A compulsory stop, manned by the Provincial Traffic Department, is in operation ± five km south of Touws River. An unmanned compulsory stop for heavy vehicles is also in operation on the south-bound carriageway in Hex River Pass. Motorists should also be alert to pedestrians and/or stray animals just north of De Doorns. Motorists should also be alert to hawkers selling alongside the road. It is illegal to stop and buy from the sellers.
Duration of Work	Ongoing
Contact for Routine Maintenance	Carl Roberts 082 468 0241

National Route	N1
Section	Laingsburg to Leeu-Gamka

### N3

National Route	N3
Section	Durban to Cedara (Hilton)
Distance	85 km
Description	This entire section is a multi-lane dual carriageway. The first 4km out of Durban carries heavy traffic with up to 5 lanes in each direction. The next 40 km, up to Cato Ridge, has 3 lanes in each direction with wide paved shoulders. The section between Cato Ridge and the end of the Pietermaritzburg Bypass (33 km) has a two-lane plus paved shoulder configuration, except on steep gradients to the east of Pietermaritzburg where climbing lanes are provided. The final 14 km to Howick incorporates the notorious, steeply graded Town Hill, which has 3 lanes with paved shoulders in each direction.
Condition of Road	Mostly good but extensive patching works can be expected between Cato Ridge and Pietermaritzburg with possible lane closures down to one lane. Misty conditions occur frequently.
Comments	In Pietermaritzburg, the Chota Motala Interchange is being upgraded resulting in narrow lanes through the interchange construction area and restricted speed limits of 60km/hr. Congestion should be expected, particularly during morning and evening commuter peak hours.
Duration of Work	Completion in December 2012.
Contact for Routine Road Maintenance	Tony Mathebula 082 670 2849 / 24hr number 074 583 3576 Lucille Mabena 083 537 3430 (Route Manager) Jared Reddy 082 478 1165

National Route	N3 (The N3 Toll Route operated by N3 Toll Concession(Pty)Ltd)
Section	Cedara to Heidelberg
Distance	415 km
Description	This section of road is a public private partnership between SANRAL and the N3Toll Concession (Pty) Ltd. This toll route is a four-lane dual carriageway road between Cedara and the Tugela Toll Plaza. From the Tugela Toll Plaza to the Wilge Toll Plaza (Villiers) the road is a four-lane single carriageway with shoulders of varying width. The section between the Tugela Toll Plaza and Warden has at-grade intersections and access roads. The remainder of the road between Villiers and Heidelberg is a four-lane dual carriageway with paved shoulders.
Condition of Road	Good.
Comments	Current planned construction works include: (i) Joint sealing between Cedara and Umgeni River. Lane closures during daylight hours only. (ii) Reseal between Escourt South Interchange and Frere Interchange is in progress and the expected completion date is December 2012. (iii) Rehabilitation between Warden and Villiers is in progress and the expected completion date is March 2013. (iv) Rehabilitation between the Vaal River and Heidelberg is in progress and will be completed by June 2013. Delays are not anticipated as there will always be one lane open to traffic in each direction and both lanes open in peak traffic period. (v) Ongoing routine road maintenance and litter collection.

Please note that the information contained herein could be subject to change. Routine Maintenance and Emergency Teams may be encountered.

	Through the construction zones, traffic may be restricted to one lane in each direction under reduced speed. During the period 14 December 2011 to 7 January 2012, all four lanes will be open to traffic.  Road users are urged to obey speed limits, maintain safe following distances and to refrain from littering.
Duration of Work	Please see above. Maintenance personnel will be on standby to deal with any emergency repairs.
